Thank you for your vote!

Do You Hear the Members Ask?

Am I getting more satisfied as an IEEE member?

Is IEEE membership worthy of the value and benefits I receive?

Is IEEE inclusive enough with my background, region, industry, gender, and age, and does it welcome my participation?

Is IEEE is more concerned with amassing profit than on promotion of technical excellence, thought leadership, and facilitation of collaboration and networking?

Is IEEE transparent enough in decision making and finance?

Shall IEEE create new platforms and new services, especially continuing education, for IEEE to continue to increase its effectiveness?

Shall IEEE embrace social media to reach out to members, especially to young professionals, industry, and under-represented groups?

Listening to You is My Job...

As Vice President – Technical Activities, my job is to listen to you to help facilitate all the members and their societies/councils to be even more successful. I will refocus on membership to create more values, champion transparency and consensus building, and develop more and better products and services.

My candidacy lies in a vision with strong conviction: **Together we are stronger than apart.** We shall work together to achieve a higher common goal to make IEEE a better place. With your trust and vote, I will make sure your voices heard.

Why am I Running?

I started as a member of many societies, served as a technical committee chair, built SP Magazine to top citation impact as Editor-in-Chief, ran a 2000+ flagship conference by setting new standards, developed systematic processes for journals operation/management as VP-Publications, started a Membership Board and created many initiatives to develop more value and benefits for members as SPS President, and led Society/Council presidents to call for IEEE financial transparency as Division Director. I am also a founder of high-tech start-ups.

I understand the critical issues you are facing and my broad experiences keep me in touch with you. You are the raison d'etre of IEEE!

Most importantly, I care for the future of IEEE!
